**BAE SYSTEMS**

**Experience the power of real-time image analysis, automated geospatial production, mapping, and 3-D visualization — all in a single application, the new SOCET GXP® v3.1.1.**

### **Video analysis**

Real-time situational awareness for active operations and historical data analysis

### **Feature analysis**

Vector-supported image analysis and 3-D feature collection integrated with ESRI®

### **Hyperspectral and multispectral (HSI and MSI) analysis**

New Xport™ interface for in-depth analysis and visualization using multiple bands of image data

### **Terrain analysis**

On-the-fly terrain analysis and editing with optimized results displayed graphically, and in stereo

### **Coming soon!**

Preview the new GXP Xplorer™ data library and search tool that helps organizations manage data on local workstations, over a network, or across the enterprise.
