

SOCET GXP®: Train the trainer

Course description

The four-day **SOCET GXP®: Train the trainer** course is designed for individuals who need a comprehensive understanding of the software so they can teach others. The hands-on course covers software installation, system administration, licensing, all core functionality and tools for multiple user types, and tips and tricks that help users streamline workflows.

After completing the course, students should be able to:

- Install SOCET GXP and set up the License Manager to allocate license modules
- Configure site and user-defined preferences
- Become proficient with all tools and workflows
- Gain a basic understanding of troubleshooting techniques; including areas that may require concentrated training

Agenda

Day 1

- Installation and set-up
- License Manager
- Setting up common and user-defined preferences
- Using preferences to customize SOCET GXP
- Workspace Manager overview
- Visual Coverage Tool

Day 3

- Terrain generation
- Terrain visualization
- Terrain editing
- Video analysis
- Templates
- Product creation
- Orthomosaic generation

Day 2
