## GEOINT Tradecraft Advancement Center

### EXPERT INSTRUCTORS AND PARTNERS WITH THE INTELLIGENCE COMMUNITY

The development of increasingly adaptable and advanced platforms and sensors accelerates the need to transform motion imagery (MI) into intelligence to support military operations. BAE Systems' multiphase training program fully qualifies MI analysts through innovative training and technology solutions.

#### **Motion Imagery Tradecraft**

##### *Intermediate-level course*

- 40-hour course
- Practical exercises with video feed tailored for the exploitation and production phase of the MI analysis cycle
- Demonstrations and group discussions ensure participants absorb material and understand objectives
- Unique features include MI's history and future implications, its crucial role in full-spectrum operations, and psychological and physiological phenomenology attributed to MI analysis
- Authored using the instructional system design model, which provides higher-level structured training, advanced analytical instruction, and enhanced critical thinking elements associated with MI

##### *Additional courses:*

#### **Introduction to Motion Imagery**

- Two-hour course familiarizing managers, recruiters, and human resources personnel with MI terms, platforms, and diverse applications

#### **Fundamentals of Motion Imagery**

- Four-hour course providing essentials of MI analysis to certified imagery analysts, geospatial analysts, and sensor operators being deployed

# Global analysis solutions

## Motion imagery

### Full-motion video

BAE Systems is the premier provider of full-motion video to analysts. It assists clients in staffing and improving FMV analytic programs, developing training, and forging interagency relationships.

### Mission management

BAE Systems' experience in unmanned aerial vehicle mission operations and airspace management increases mission success in wartime operations.

### Wide-area persistent surveillance

The company's imagery analysts develop short- and long-term research products to address the security priorities of government clients.

### Collection management

BAE Systems has a proven track record of building and managing collection capabilities — supported by tailored analysis — to enable

precision collection of intelligence data.

### Deployed analytical solutions

With a proven hazardous-duty deployment capability, BAE Systems is experienced in deploying and managing analysts in areas of conflict.

### Sensor operation

The company's sensor operators have access to advanced emerging technology and training to continually develop their skills.
